

Focus Group Participants Needed

Get a \$50 Visa card for sharing your thoughts!

Nearly 15% of adolescents will develop an eating disorder by the age of 20*. At Pine Rest, we are developing treatment to significantly reduce that number. Our treatment approach will be founded on evidence-based research and experiences of those who lived with these disorders. If you would like to help inform our clinical design, we invite you to attend one of our upcoming focus groups.

We are looking for insights from:

- Individuals that are currently receiving or have received treatment for an eating disorder as an adolescent (18 years or younger).
- Families or caregivers of individuals currently receiving treatment or received treatment as an adolescent.

Join us for an in-person focus group at our 68th Street campus on May 15 from 9:00-10:30 a.m. or May 16 from 4:00-5:30 p.m. to receive a \$50 Visa gift card.

Once you have applied, a member of the project team will reach out to you to schedule your session.

*Rienecke, R. D. (2017). *Family-based treatment of eating disorders in adolescents: current insights*. *Adolescent Health, Medicine, and Therapeutics*, 8.
